DECAPITATED BY AN ELEVATOR.

A HGRRIBLE ACCIDENT SHOCKS THE EMPLOYES DISCOVERY OF A WIDOW WHO GOES TO MOURN IN A SIXTH-AVE, STORE,

Frederick Hoffman, of No. 360 South Fourth-st. Brooklyn, an elevator man employed in Samuel umann & Bro.'s furniture store at No. 235 Sixth-ave, got caught between the elevator and the side of the shaft, yesterday morning, such a manner that a part of his head was sheared off. He died instantly, and his body fell to the bottom of the shaft.

Exactly how the accident happened is not clear. It was not witnessed by any one, and as Hoffman had always appeared to be experienced in the manhim early in the morning to take a case of goods up to the top floor of the building. Hoffman started second floor, and the next instant Hoffman's man gled body fell to the bottom of the shaft.

whose drygoods establishment adjoins Baumann's place, saw the body fall. He gave a shrick of horror that attracted all the other men in the place. Several of them went down to the bottom of the shaft, while some one sent a call to the New-York Hospital for an ambulance. It was not needed. The man's body was so badly mangled that his fellow-employes shuddered as they bent over it. The police are unable to learn how the accident happened, but it is thought that while Hoffman was dragging the case off the elevator, he accidentally touched the rope that controls it, and caused it to shoot upward. He probably made a spring, either to jump on the elevator or seize the rope, and his head was thus caught between the floor of the elevator and the ceiling of the second floor.

THE CONFLICT OF JURISDICTION.

JUSTICE TRUAX RESERVES DECISION ON THE MURRAY HILL BANK TROUBLE.

An application was made to Justice Trunx in Special Term, Part I, of the Supreme Court, yes terday, by Samuel Untermyer, on behalf of the directors and stockholders of the Murray Hill Bank, for an order directing the State Bank Super intendent to turn over to Spencer Trask and Miles M. O'Brien, as receivers, the assets of the Murray Hill Bank. Trask and O'Brien were appointed receivers about two weeks ago by Justice Pryor in the Supreme Court in this city.

On Thursday Justice Dickey, in the Suprem Court, Brooklyn, signed an order appointing Edward H. Hobbs, of Brooklyn, and Benjamin B. Odell, jr., of Newburg, temporary receivers, with bonds in \$100,000. This creation of two sets of receivers resulted in the application made by Mr. Untermyer yesterday, and counsel said that the mition would be followed by an application to punish Bank Superintendent Kilburn for contempt

Mr. Untermyer, in presenting his application, se verely criticised the action of Bank Superintendent Kilburn, and commented upon the conduct of the tice Dickey after they had been defeated on the same points before Justice Pryor. He said that on the Bank Superintendent closed the bank and began an investigation. Thereupon the depositors met and appointed a committee to rep

After argument by counsel on both sides, Justice Truax remarked that he would do what could properly be done to enforce Justice Pryor's order, and that the main question was whether the receivers applinted by Justice Pryor could enforce the order until the appeal had been decided. Final decision was reserved.

Deposits of gold in the Sub-Treasury in exchange for greenbacks were \$600,000.

The St. Louis and the Lucania, which arrived last evening, had considerable gold on board.

Henry Clews said yesterday: "During the Baring panic in 1890 we shipped, during seven months, \$75,000,000 in gold to England, because the conditions called for it, and it finally gave financial relief to London, the great money centre, and aided immensely in stopping the panic. Now we want gold on this side, and it would not be at all surprising if we should draw as much as \$78,00,000 from Europe before the current turns again in favor of an export of the precious metal. The trade balance is now, and is going to be for some time to come, largely in our favor, which makes the current of gold this way a genuine one. This has been produced by forced economy, which has lessened our imports, while our exports for some time past have been increasing. They are especially large at the present time. Freight room of every description has been taken right up to next becomber. Last week alone the exports of flour and wheat were equal to \$2,50,000 bushels. Corn and all other food products, peroleum and cotton, are also going forward very rapidly. To show the ability to spare the gold which is coming this way, Great Britain, France, Austria and Russia added to their gold holdings during the year 1805, \$180,0000. Since 1890 up to this time this country has been a constant buyer of American securities held in European speculative hands. The supply of speculative holdings in Europe new is very small.
